Take back control of IT with Modern IGA

Accelerator Package

Deploy in 12 weeks

Use our Accelerator Package to ensure a fast and successful IGA deployment. It provides a reliable starting point for IGA projects with a standardized implementation approach for deployment, a best-practice framework for process design, and training for efficient user adoption.

Come and meet us

welcome @ **IDM**

DEAR DELEGATE

The global Identity and Access Management market will reach \$21.7 billion by 2025. It is a prevailing, niche market that has evolved from spreadsheets to focus on access control and identity management, to include governance, analytics and automated approvals. IAM has transformed into an essential feature of an organisation's cybersecurity strategies. Today, as threats advance by leaps with more sophisticated hackers, IAM solutions must guarantee robust security without hindering user experience and business productivity.

In such a multifaceted landscape, IAM experts must perform as the orchestrators of this complex security environment. They must ensure that identity is at the centre of the digital transformation strategies, create a robust connection of identity with IoT technologies and devices, develop resilience protocols or stay up to date with the latest technology advances. Yet, as investments in IAM approaches are constricted, experts in the field must also face the mission of nurturing excellent IAM professionals under pressuring budget conditions.

Despite all constraints and burdens, IAM strategies continue to improve and progress amidst a plethora of ever-evolving threats. Indeed, IAM is increasing its visibility and standing out as a critical gear in the cybersecurity engine. The improvements can be found in biometric inputs featured in the latest MFA systems, in blockchain considered the next identity manager or in automated processes to support agility.

Today's conference will address how to elevate your digital transformation journey with BYOA, the importance of centrality in customer IAM, how IGA helps you walk the tightrope of efficiency and security, to name but a few of the thought leadership and real-life case studies on show.

We hope to offer you an impactful conference that connects enterprises and fosters discussions that can help improve your IAM strategies. We also hope the day will show you that it is possible to balance security with opportunity, to establish people-centric approaches and ensure that IAM is seen as a top-line contributor and not an impediment to growth.

We ask that you take a moment to visit our exhibitors, selected to provide added benefit to you in terms of networking and insight.

We would also like to take this opportunity to thank you for attending the conference, our event sponsors and our fantastic programme of speakers, all of whom have kindly given up their time to be with us today.

For those on Twitter, please use #wmidm as a trending tag in your Tweets today; any questions or comments for the speakers are most welcome.

Any feedback you care to offer will have a direct influence on all future conferences.

We hope to see you again at our next IDM Europe event in the Netherlands 4th October 2023.

If you would like to contribute as a speaker, please, get in touch with our programmes team at speakers@whitehallmedia.co.uk

Michael Hughes
Programmes Director
Whitehall Media Ltd.

Whitehall Media Ltd, Centurion House, 129 Deansgate, Manchester M3 3WR, UK
t: 0044 (0) 161 667 3000
e: edm@whitehallmedia.co.uk
w: www.whitehallmedia.co.uk/idmeurope
Follow us on Twitter @whitehallmedia
Whitehall Media will be tweeting about the event using the hash tag #wmidm

NETWORK
DEBATE
INNOVATE

If you need any assistance at the event please visit the Help Desk situated at the entrance to the exhibition.

INTERNET ACCESS

Wireless access in the main conference room and exhibition area is free for delegates attending the event.

NETWORK: Whitehall Media

PASSWORD: Events123!

Please note we cannot be held responsible for the security of this Wi-Fi network. Use of this and other 'Open' Wi-Fi networks in the venue means you should make sure you have security controls in place to protect your device when using the Wi-Fi.

If you need further assistance using this code, please visit us at the Registration area or Help Desk.

TWITTER

@whitehallmedia will be tweeting about the event using the hash tag #wmidm

Please follow us and tweet using this hash tag to join the debate and raise questions on the presentations, as these themes may be included in the question and answer sessions with the speakers.

PRESENTATIONS

Copies of the presentation slides will not be distributed on site. Post event an email will be circulated to attendees asking them to complete an online questionnaire evaluating their experience at the conference. Once this is completed delegates will receive a further email giving instructions on how to access selected presentations. Please note that it may take up to 2 weeks post event to gain clearance from speakers for the circulation of their slides and it cannot be guaranteed that each speaker will agree to their presentation being circulated in this way. **Post event you will also be sent a link to generate your CPD certificate – this may take up to one month post event.**

BADGES/YOUR DATA

Your badge contains a QR code which will be scanned on arrival at the event to track your attendance. The QR code contains the contact information you used to register your attendance and acts like a 'business card'. Therefore please be mindful when disposing of your badge and where possible use the outlets provided by Whitehall Media on departure (where all badges will be shredded and the holders recycled). Your registration will be administered as per the events privacy notice (<https://whitehallmedia.co.uk/events/privacynotice>) which you accepted at the time of booking. You were able to make a selection regarding who you wished to contact you post event. Unless you opted out the contact details of attendees will be circulated to exhibitors at the event – allowing them to make contact post event with details of the services they provide in this field. All correspondence will include the option to unsubscribe. Should you have opted out of this contact but consent to having your badge scanned by an exhibitor or upon entering a seminar room – this over rides the 'opt out' to that particular contact.

PLEASE NOTE: If you do not wish to be contacted by the company presenting the seminar you attend please do not allow yourself to be scanned upon entry to the seminar room.

FILMING AND PHOTOGRAPHY

The event will be photographed and filmed for promotional purposes under copyright of Whitehall Media. The footage may be used by speakers and sponsors for their marketing purposes, and may be displayed on the event website www.whitehallmedia.co.uk to promote this and subsequent events. If for any reason you do not wish to be captured please approach our event manager via the help desk who will speak to the photographer and video team.

TOILETS

Toilets are clearly signposted on all levels of the venue.

SPECIAL DIETARY REQUIREMENTS

Various dietary requirement options will be served as part of the lunch selection at the conference. Should any dietary requirements fail to be met, Whitehall Media cannot take any responsibility for this due to the 'standing' nature of the lunch served. Delegates are responsible for identifying their special dietary needs with a member of venue staff to either query the contents of the food or request an alternative – although this cannot be guaranteed that this can be provided.

FIRE REGULATIONS/INSTRUCTIONS

Delegates are reminded to take note of the venue fire evacuation procedure – this will be outlined at the start of the conference sessions. If the fire alarm bell sounds, delegates should evacuate the building and congregate at the nearest assembly point.

SECURITY

All delegates must register and receive their badge which must be worn throughout the day and is required to access the conference, seminars and exhibition. Please limit the amount of excess baggage you take into the conference sessions and make use of the cloakroom facilities at the venue. Any items left unattended in the conference areas may be inspected and removed. Delegates are reminded that their personal property is their own responsibility and neither the venue nor the Organisers can accept responsibility for any loss of items.

DISABLED ACCESS

The venue has lift access from street level and is accessible throughout via ramp/lift. If you are a wheelchair user or have mobility challenges, please ask a member of the venue staff for further details regarding access and to arrange your Personal Evacuation Procedures (PEP).

FIRST AID

Any participants requiring first aid should report to the main venue reception or contact a member of Whitehall Media staff.

COVID19

We ask delegates to be respectful of each others personal space. If you wish to wear a mask but don't have one, they are available from the help desk. Please make use of the hand gel available throughout the event space.

ORGANISERS

The conference has been produced and organised by Whitehall Media.

CONNECTING ENTERPRISE WITH BUSINESS

Protect Identities & Access from Cyberthreats

BeyondTrust is the worldwide leader in intelligent identity & access security, empowering organizations to protect identities, stop threats, and deliver dynamic access to empower & secure a work-from-anywhere world.

Our integrated products & platform offer the industry's most advanced privileged access management (PAM) solution, enabling organizations to quickly shrink their attack surface across traditional, cloud and hybrid environments.

Privileged Password Management

Endpoint Privilege Management

Secure Remote Access

Cloud Security Management

Join our keynote session on the main stage to learn about **"Breaking the Ransomware Attack Chain"** then take a deeper dive in our breakout session to find out how to defend attacks with PAM.

Visit BeyondTrust.com for more information

keynote speakers @ IDM

CONFERENCE CHAIR

Robert Garskamp

Entrepreneur, Advisor on Digital Identity Matters and Founder of the IDnextplatform

With the enormous speed of technological digitalisation transformation nowadays, Robert believes that it will influence, constitute and shape our society where you are able to control your identity on attribute level within a secure and privacy-regulated basis.

As an expert for 10 plus years, Robert strives to share his knowledge and experience regarding several topics about digital Identity, security, privacy, mobility, risk management and compliance with several organisations in different sectors. He also advises and consults various organisations (in the public and private sector) related to digital identity.

Robert is Founder of the IDnext platform, a pan-European open and independent platform to support and facilitate innovative approaches in the world of the digital identity, creating awareness about digital identity, providing a knowledge and networking platform for experts in IT, Business and Marketers as a European centre of expertise.

KEYNOTE SPEAKER

Shashi Prakash Singh

IAM Architect, ABN AMRO Bank N.V.

Shashi P Singh prior to joining ABNAMRO bank has worked in the R&D department of product-based companies like Philips, Verisign, RSA Security, Siemens and Harman.

He comes with deep technical know-how in the Identity & Access space. He has in-depth skills in key management, authentication, authorization, encryption, Identity federation and application security.

He also comes in with a rich experience in design as well as the implementation of complex IAM solutions enterprise-wide.

In addition, Shashi brings to the table hard negotiation skills which are a key to ensuring Security is understood and taken up in the desired way for a product.

KEYNOTE SPEAKER

Selin Kamas

IAM DevOps Tech Lead, Swisscom

Selin has almost 7 years of identity and access management experience and is currently IAM DevOps Tech Lead with Swisscom.

Most of Selin's career has been spent working in Identity and Access Management with the only exception being when working as a Software Engineer/Product Owner/Cyber Security Engineer in various security teams.

Selin also has an interest in Network Security, Web App Security, Monitoring, Automation, and Cloud Management.

KEYNOTE SPEAKER

Ronald van der Rest

Product Owner CIAM, NN

Ronald is working as Product Owner of the CIAM platform within NN.

His goal is to create a robust, scalable and flexible CIAM platform, which enables the organization to utilize identity and access management as a strength.

A platform fit for the dynamic market of the financial services industry, servicing the Retail, Business Customers and Intermediaries channels.

He brings along over 10 years of experience in Information Management, Cloud Hosting, Integration, IAM, IT Security and DevOps techniques.

Having been a DevOps engineer himself in his career, he approaches solutions with not only the customer journey in mind but also includes a focus on the developer experience to ensure a secure and sustainable fast time-to-market for the long run.

KEYNOTE SPEAKER

Matthew Berzinski

Senior Director, Product Management, ForgeRock

As a Senior Director of Product Management, Matt is responsible for building product strategies in bringing the ForgeRock product portfolio to market. Matt works closely with customers and partners to understand the current market demands and bring them to the product teams to deliver the most modern and comprehensive platform in IAM. Prior to joining ForgeRock, Matt has over 20 years experience in the Identity Management and Security space working with companies such as Oracle, Symantec, Unisys and Passlogix.

KEYNOTE SPEAKER

Craig Ramsay

Senior Solution Architect, Omada

Craig is a Senior Solution Architect at Omada with over a decade of experience in the Identity & Access Management (IAM) field. He has since worked within Identity functions at large Financial Services organizations and within Professional Services as a consultant. In this time, he has gained experience defining and delivering on Identity and wider security strategies from within and as an external consultant.

He is currently responsible for providing technical support within the sales cycle for Omada prospects and customers. Helping them understand the importance of Identity and aligning their business processes and requirements with the right technical solutions.

One Platform. All Identities. Any Cloud.

www.forgerock.com

keynote speakers @ IDM

KEYNOTE SPEAKER

Bas Kerpel

Product Owner Onboarding & Authentication, NN

Bas is working as Product Owner of Onboarding & Authentication at NN.

The O&A team will deliver 2 things.

1. Implement a 2-minute digital customer onboarding for all our retail customers of NN considering different legal requirements per type of product
2. Implement a banking grade transaction signing methodology in the NN app

The biggest challenge the team has is to align the 3 core components in these journeys. A solid customer experience, Being compliant end all at acceptable costs.

With the team, we are well underway in delivering both capabilities using cutting-edge technology & whilst being secure & compliant.

Bas has been a consultant in the financial industry with a focus on digital innovation & digital identity for 15 years. Enjoys working on complex programs and delivering value for stakeholders.

KEYNOTE SPEAKER

Edwin Grimminck

Principal Solution Consultant, SailPoint

Edwin has been working in IT with a focus on Identity, Governance and Security products for over 20 years. After working as an Identity and Access Management consultant, designing, implementing and advising in IAM projects, he is now working as a Sales Engineer at SailPoint. In this role Edwin supports his sales colleagues in the Benelux with all technical related questions, product demo's, presentations and workshops on the Identity and Security portfolio. Expertise: Identity and Access Management, Security, Single Sign On, Strong authentication, NetIQ/Novell and SailPoint products.

KEYNOTE SPEAKER

Patrick van der Veen

Director of Security Engineering, Delinea

Patrick van der Veen is Director, Security Engineering at Delinea based in the Netherlands. With over 12 years in Pre-Sales Engineering, Patrick has a strong background in infrastructure, virtualization and security, and holds CISSP and OSCP certifications. Patrick is also an active member of the cyber community, a Certified Ethical Hacker (EC-Council) and has worked across EMEA in a variety of IT fields and major enterprise projects.

KEYNOTE SPEAKER

Alex Fagioli

Chief Executive Officer, Intragen

Alex is CEO of Intragen, the Identity and Access Management (IAM) experts dedicated to protecting your organisation's assets by securing your digital identity. Intragen is focused on delivering Hybrid Cloud ready aaS IAM solutions that reduce risk, time to value and cost.

Previously CEO at Tectrade, a data protection and storage business with a world-leading Backup aaS proposition, Alex prided himself in being the last line of defence for customers. Now with Intragen, he is focused on being the 1st line of defence against cyber threats.

Alex is passionate about moving the delivery of IAM solutions from complex to autonomous.

KEYNOTE SPEAKER

Mehmet Yaliman

Senior Solutions Architect, Ping Identity

Mehmet has been working in the Identity space for over a decade, spending time in various roles at the customer, integrator and vendor sides. In his current role at Ping Identity as a Sr. Solutions Architect he supports customers and prospects across EMEA to find the right solution for their next identity-related project.

After starting his IT career in 2007 with web and application development, Mehmet moved to the Identity and Access Management space in 2009, continuing to navigate in the same since then. Mehmet has worked in various roles, from consultant to support engineer and architect, on all fronts, system integrator, customer and vendor. In 2018 he (re-)joined Ping Identity in his current role as a Senior Solutions Architect for EMEA.

KEYNOTE SPEAKER

Chris Butchart

Solutions Engineer, BeyondTrust

With a background in cutting-edge SaaS security products, spanning both endpoint and network technologies, Chris has helped many companies address concerns around secure environments and privileged access. Now at BeyondTrust, using insight from a broad range of verticals and sizes of organisations, Chris delivers successful PAM projects through a consultative strategy combined with a flexible portfolio of options.

KEYNOTE SPEAKER

Ivo van Bennekom

EMEA Impact Center Leader Digital Identity, PwC

Ivo leads the PwC Digital Identity Impact Center for the EMEA region. Ivo has over 15 years of experience within the digital technology space, with a specific focus on global identity market patterns and translating them to business objectives for clients. He is a strategic and tactical Subject Matter Expert on digital identity topics advising client senior management. Ivo works for a variety of sectors, with a main focus on Finance, Consumer markets and high-tech firms. He is engagement leader of several global Cyber Security & Digital Identity transformational programs.

Experience A Better Experience.

For the modern enterprise, secure transactions are just the beginning. The real competitive advantage is all about creating exceptional digital experiences. At Ping Identity, we work tirelessly to ensure you can deliver secure and seamless experiences.

Your customers. Your workforce. Smooth and secure.

Finding the perfect balance of security and convenience to keep your users secure and satisfied starts by innovating your digital experiences. This is easily achieved with Identity Orchestration. You can design frictionless user experiences using PingOne DaVinci's no-code interface, seamlessly integrate your legacy tools, and rapidly create, test, and deploy user journeys. No coding. No waiting. No problem. **That's the power of Ping Identity.**

Visit us at [IDM Europe](#) and speak with an identity specialist today

pingidentity.com

keynote speakers @ IDM

KEYNOTE SPEAKER

Sicko van der Brug
RE RA
Productowner IAM,
Jumbo Supermarkten

Sicko van der Brug has been responsible for Identity and Access Management of employees at Jumbo for 3 years as Product Owner IAM. In the 6 years before that, as Internal & IT Auditor, he was closely involved in security, risk and in control issues within this retailer. After studying Business Economics, he worked as an accountant and IT auditor, before making the switch to the Retail sector 10 years ago as an Internal Auditor. Sicko studied Business Economics at the University of Groningen, after which he completed the post-doc courses Accountancy and IT Auditing.

KEYNOTE SPEAKER

Jos Groenewegen
CTO,
The Identity Managers

Jos is CTO and co-founder of The Identity Managers. He has been active in the IGA world for over a decade and he has played a leading role in a large number of organizations to solve challenges in the IGA field. By having worked as a consultant for years and being responsible for IAM internally at organizations, Jos has the broad experience to ensure that the solutions devised by The Identity Managers also lead to good results in the organizations they support. In addition to implementing and managing IAM solutions, The Identity Managers has developed the iD Veritas platform.

KEYNOTE SPEAKER

Mark Edge
Director Northern Europe,
Cyolo

Mark is the Director for Northern Europe at Cyolo, the identity-based connectivity experts. Cyolo helps customers secure access and connectivity to critical systems by extending MFA and SSO to those applications and tools which do not natively support it, both in IT and OT, all while storing nothing in the Cloud to reduce data protection headaches and minimise the attack surface.

Mark has nearly three decades experience under his belt helping customers solve problems in the network and cyber security arena across EMEA and the US.

KEYNOTE SPEAKER

Jacob Mareen
Senior Manager – Digital Risk
Management & Assurance,
KPMG

Jacob is a lead technology advisor for KPMG in the field of Identity and Access management. With close to 10 years of experience, his main responsibilities include delivering complex identity governance and (privileged) access management projects and transformations, development of IAM strategies and roadmaps, authorization model (re)-designs and management of IAM security operations teams.

KEYNOTE SPEAKER

Patricia Sousa Lara
Senior IAM Manager,
Firmenich

Patricia Lara is an experienced IT Professional, responsible for the IAM area at Firmenich. She is known for helping, managing, and supporting colleagues as they develop strategic investment plans.

Patricia's career has taken her around the world with large international companies like Shell, Coca-Cola, TechData and Paul Hartmann, having worked in different areas of IT Infrastructure Operations.

Driven by her passion for going furthest, she takes pride in re-imagine ways to make people's lives easier with the customer focus always in mind, in the path of digital transformation where the customer is at the central stage.

KEYNOTE SPEAKER

Stephen Amolo
Luxembourg Institute of
Science and Technology

Stephen has led an impressive IT and cybersecurity engineering career in his 10 years of working experience across the humanitarian sector, professional services, and satellite and research technology industries.

He has significantly contributed to and accomplished extensive multi-technology and security projects during his tenure in different sectors.

He is a cybersecurity engineer leading the identity and cloud security at Luxembourg Institute of Science and Technology (LIST), in Luxembourg, EU.

Steve has a passion for creating awareness on cybersecurity topics and has been a two-time return speaker at the NetHope Chapter forum providing critical insights on IT and cloud security

seminar speakers @ IDM

SEMINAR SPEAKER

Ian Lowe
Director of Industry Solutions,
Okta

Ian Lowe is Okta's Director of Solutions Marketing for EMEA. In his 19 year career, Ian has become a recognised product marketing and sales enablement leader having created and launched successful cloud-based security solutions that are used by top technology firms, financial services organisations and Governments around the world today; Including but not limited to the White House, Microsoft and HSBC.

SEMINAR SPEAKER

Robert Byrne
IAM Strategist,
One Identity

Rob Byrne, a field strategist at One Identity, has worked in IT for more than 20 years in various roles – including development, consulting and technical sales – the majority of his career has focused on identity management. Prior to joining Quest, Rob worked for Oracle and Sun Microsystems.

SEMINAR SPEAKER

Suleyman Mun
Solutions Engineer,
Saviynt

With nearly 10 years of experience in Identity and Access Management, Suleyman focuses on supporting Saviynt's Benelux customers.

Based in Netherlands, Suleyman guides the design, implementation and management of IAM projects for some of the region's leading public and private sector organisations. Suleyman brings his experience of working for both vendors and system integrators to help Saviynt customers design, develop and deploy IAM solutions that exceed business requirements and expectations

09:10 (CEST)

Bring Your Own Authenticator (BYOA) - Elevate the journey of secured and sustainable digital transformation

Shashi Prakash Singh

Shashi Prakash Singh, IAM Architect, ABN AMRO Bank N.V.

After the great success of Bring your own device (BYOD) and bring your own identity (BYOI), the next generation MFA brings the journey of Bring Your Own Authenticator or BYOA. The Employer can trust authenticators owned by users.

The BYOA makes the journey of MFA or Password-less fast, simple and secure experience for your end users across the enterprise. It also reduces the logistics complication of MFA deployments across the globe. When properly configured, it serves as an automatic identity authenticator for secure enablement.

In the presentation, I will cover how the digital transformation towards next gen MFA helps in security that delights employees, elevates the digital transformation journey and eliminates the usage of passwords.

09:25 (CEST)

Evolving Contextual Insights to Enable Exceptional And Secure User Experiences

Matthew Berzinski

Matthew Berzinski Senior Director, Product Management, ForgeRock

The massive advance in digital transformation over the past two years has led to a rapid increase in digital fraud. To combat this, some organisations have put into place many harsh security measures that greatly reduce user experience, which costs them customers and revenue which can be more detrimental to the business than the initial losses due to fraud. AI driven behavioural analytics can enable organisations to find the "sweet spot" which delivers exceptional user experiences combined with the utmost security to retain customers and greatly reduce fraud. See how the evolution of Contextual Identity Data processing has fundamentally changed this paradigm.

09:40 (CEST)

The importance of centrality in customer IAM

Selin Kamas

Selin Kamas, IAM DevOps Tech Lead, Swisscom

The transformation of the IAM landscape into a Multi Service Provider is taking shape.

The federated solution has been fully realised and has delivered its promised benefits. However, business requirements are driving the need for a convenient and fast way to provision rights to users that, despite the growing portfolio of IAM products and processes, do not yet seem to have been catered to. Therefore, we need to build a solution to provide the self-service capability to the user at a pace which works for both the business and the customer.

09:55 (CEST)

How IGA Helps You Walk the Tightrope of Efficiency and Security

Craig Ramsay

Craig Ramsay, Senior Solution Architect, Omada

Compliance with information security policies and standards should not come at the expense of productivity. Equally, business operations should not be a free-for-all in the name of efficiency, endangering the confidentiality, integrity and availability of your critical business assets. Bringing equilibrium to these often-counteracting priorities is complex and challenging, but a strong Identity-centric security strategy with Identity Governance & Administration (IGA) at its core can do just that.

Key takeaways:

- How to build and communicate a business case that demonstrates IGA is a crucial tool in mitigating key risks across your organization
- Why IGA should be simple, scalable and agile to enable you to best manage identity related risk, pursue Zero Trust and Software Defined Security strategies, and more
- Case studies looking at how organizations balanced their security and efficiency requirements using IGA

10:10 (CEST) Building a robust CIAM foundation, fit for the dynamic financial market

Ronald van der Rest

Ronald van der Rest, Product Owner CIAM, NN
Bas Kerpel, Product Owner Onboarding & Authentication, NN

As organizations are recovering from the pandemic, many of them embark on a digital transformation at high-speed. Investments to drive online business, powered by customer insights and an attractive user experience, yet secure and compliant with rules and regulations, have never been bigger.

Bas Kerpel

NN, an international financial services firm with over 15,000 employees, is changing from a traditional insurance firm into a modern and online financial services firm that focuses on frequent and valuable customer interactions.

NN is providing these online services across multiple channels in a secure and compliant manner while offering its customers an outstanding user experience.

For this NN has implemented a robust innovative IAM platform that entails key functions like identification, verification, authentication and authorization, fit for the dynamics of the financial industry.

Join Ronald van der Rest & Bas Kerpel, who lead NN's IAM Platform Teams, as they explain how powerful Customer Identity & Access Management can be when you are transforming your organization to become successful in doing business online.

Ronald and Bas will share relevant insights into NN's IAM Platform and will touch especially on its identity orchestration capabilities.

- How to onboard new customers within 2 minutes while applying a zero-trust approach
- How to add or change authentication flows in real-time without the need to code or re-code
- The power of CIAM as the foundation for modern online business models
- How to maintain a clean architecture while connecting IAM products to build valuable and sustainable solutions
- IAM compliance considerations in the financial industry

10.25 (CEST) Why do IGA implementations get stuck on the basics and how to walk around that pothole?

Edwin Grimminck

Edwin Grimminck, Principal Solution Consultant, SailPoint

Identity Management and IGA have been around for a long time and over these years there have been many discussions and sessions on best practices, Joiner-Mover-Leaver processes etc. etc. Yet we still see many, if not most implementations only touching the bare minimums, very often they are limited to connecting HR to AD, Azure and maybe a handful of business applications for Joiners and Leavers. Even Movers seems to be an advanced use case for many. So why is that and how can we improve this? In this session we will discuss the necessity of adding advanced technology to enable you to setup the basics of IGA and then some.

This session will give you insight into the following:

- Why establishing and maintaining least privileged access is critical for most applications and not just some
- Adding context to permissions and roles
- Handling the dynamic nature of applications, entitlements, and organizations
- See how you can safely extend a typical basic IGA installation

10:40 (CEST) Questions to the Panel of Speakers

11:00 (CEST) Refreshment Break Served in the Exhibition Area

11:25 (CEST) The Conference Chair Introduces Session Two

Robert Garskamp

Robert Garskamp, Founder, IDnext Association

11.30 (CEST) Breaking the Ransomware Attack Chain

Chris Butchart

Chris Butchart, Solutions Engineer, BeyondTrust

Join BeyondTrust and learn the how you can break the attack chain and establish a solid foundation for Ransomware project success. Chris Butchart, Solutions Engineer, will cover: – Common attack chain entry points – Practical steps you can take to block entry – How PAM ensures project success.

11.45 (CEST) Strategies to Make Zero Trust become Zero Friction

Patrick van der Veen

Patrick van der Veen, Director of Security Engineering, Delinea

Regulatory bodies, government agencies and CIOs continue to mandate Zero Trust as a key cyber security framework. But what are the main considerations and how do you achieve this vision without sacrificing productivity? With many definitions and different interpretations of Zero Trust as well as ways to communicate its importance, it is key to understand the critical steps.

This session gets back to basics, covers the fundamentals and helps uncover the reality check on what Zero Trust really means along with the path to success.

Key takeaways, including examples from customer implementations of:

- How the principles of least privilege can be applied at speed and scale to help enable Zero Trust
- Just-in-time and on-demand privilege elevation strategies
- How organisations can balance security and productivity while securing critical infrastructure
- Critical steps that IT decision-makers must take to address current cybersecurity challenges

12:00 (CEST) Making Digital Identity Enable Your Organization's Cloud/Digital Transformation

Ivo van Bennekom

Ivo van Bennekom, EMEA Impact Center Leader Digital Identity, PwC

If the last two years have proven anything, it is that businesses going digital and becoming cloud-based will only increase in velocity. Digital isn't supporting the business anymore, digital IS the business. PwC's CEO survey states that over 50% of companies are investing in digital transformation with double digit numbers, yet see cybersecurity as their biggest concern. Zero Trust is today's main principle and IAM is seen as the foundation.

As the digital business increases in size, security and Digital Identity gets more complex.

IAM teams need to support these transformations, apply Zero Trust and make sure the transformations will not slow down. Even though our peers do not always understand the relevance of IAM in their transformations. This leads to the questions about our responsibility as the IAM team, what should we expect from our executives and how to get to the outcomes we are looking for?

Ivo will bring a story to life about how we need to rethink IAM in order to create sustainable outcomes, leveraging modern concepts. He will do so by sharing his experiences working with global enterprises on IAM, next to the views of over 5,000 CEO's and more than 3,600 CISO's from the CEO Survey and the Digital Trust Insights Study that PwC conducts annually.

12:15 (CEST) Questions to the Panel of Speakers

12:30 (CEST) Delegates move to seminar rooms

12:30 (CEST) Seminar Sessions

Delegates can choose to attend one of the following seminar sessions:

Combat Digital Fraud with Contextual Identity Intelligence

SEMINAR A

Matthew Berzinski Senior Director, Product Management, ForgeRock

Online payment fraud accounted for \$20 billion in losses worldwide in 2021. As consumers continue to shift from brick-and-mortar to online channels the threat landscape continues to grow, emboldened by ever more sophisticated attacks perpetrated by crime syndicates, persistent threat groups, and rogue state actors. Organisational spending on fraud prevention continues to rise, yet fails to deter malicious actors. Despite this, legacy identity and access management (IAM) provides an open door for continued fraud attacks. But there is another way. Purpose-built IAM leverages the latest in artificial intelligence (AI), machine learning (ML), and advanced pattern matching to help you:

- Flag anomalous behaviours and risky access requests, providing real-time threat assessment
- Enable adaptive security friction at the right time and across the right channel
- Prevent account takeover (ATO) attacks by driving smarter access decisions

Join this session to learn more about how contextual identity can help you mitigate risks, today.

Session 3 @ 12:30 - Main Conference Room

Matthew Berzinski

Ransomware: What You're Up Against & How to Defend with PAM

SEMINAR B

Chris Butchart, Solutions Engineer, BeyondTrust

Ransomware shows no signs of abating. Digital transformation, expanding cloud deployments, and increased remote work are all bolstering the Ransomware Attack Chain, creating new planes of privileges for ransomware to exploit.

Breaking the chain is more vital than ever. Despite this, organizations continue to mishandle projects, leaving themselves at significant risk of attack.

Following the overview on the main stage, join Chris Butchart as he takes a deeper dive into exploring how to break the chain with PAM.

Session 3 @ 12:30 - Oudegracht 5

Chris Butchart

Run Towards Your Problems, and not Away From Them; Start with Identity

SEMINAR C

Ian Lowe, Director of Industry Solutions, Okta

Are you running from your problems? Or towards them? The work-from-anywhere and on any device environment has emerged, making it harder than ever to keep the bad guys out. We can no longer rely on a physical perimeter, but we can modernise our identity controls to better safeguard our users, devices, applications and data.

In this session we explore how an identity-first approach can drastically improve your security posture, while also improving the end user experience.

Session 3 @ 12:30 - Domtoren 3

Ian Lowe

Why traditional IAM strategies are failing in the modern threat Landscape

SEMINAR D

Robert Byrne, IAM Strategist, One Identity

It is known that organizations considered to be "in compliance" nevertheless suffer significant cybersecurity incidents. In this session we will review some of the reasons for this paradox and strategies to resolve it. In particular we will focus on the role of identities and users and especially privileged accounts which are the number one target of cyberattacks. Why? With these accounts/users' extensive access, hackers can use them to do the most harm to your organization. So, here's the question: How confident are you that your most privileged users are safe and under control?

Join us to discover:

- Current security risks and trends
- How to mitigate the security exposure to protect the most sensitive accesses in your IT landscape
- Why privileged accounts and users must be governed properly

Session 3 @ 12:30 - Domtoren 4

Robert Byrne

Identity Lifecycle Tools for Your Entire Workforce

SEMINAR E

Suleyman Mun, Solutions Engineer, Saviynt

The global workforce is experiencing tremendous churn caused by the Great Resignation and other effects of the pandemic.

Security teams are overwhelmed by the sheer volume of joiners, movers, and leavers and the increased focus on third-parties to enable the business.

Managing identities and access policies across your entire workforce requires integrated tools to automate manual processes and provide risk-based visibility into potential weaknesses.

Join this session to find out how cloud-based solutions for identity governance and administration combined with third-party access governance are critical to close your employee and third-party security gaps.

Session 3 @ 12:30 - Domtoren 5

14:05 (CEST) How to Secure Your Digital Identity

Alex Fagioli

Alex Fagioli, Chief Executive Officer, Intragen

- Aligning and synergising an IAM program with your organisation's own mission and approach
- Implementation and deployment acceleration
- Identity Management as-a-Service in a hybrid cloud world

14:20 (CEST) Extraordinary User-Experiences in Identity: Unattainable or a match made in heaven?

Mehmet Yaliman

Mehmet Yaliman, Senior Solutions Architect, Ping Identity

We live in an era where everyone uses many (web-) applications and often suffers from time consuming, complex registration, authentication and further identity processes. This leads to unhappy users, which will start looking for alternatives making their lives easier, or for the very least not more challenging.

Are extraordinary User-Experiences really unattainable?

There are dozens of Vendors on the market, each with their own approach. These approaches frequently don't fit the vision, or require costly adjustments to do so. These adjustments can limit the flexibility and agility immensely, making the eventual solution very fragile and rigid.

Another alternative is to introduce an orchestration platform, which makes it possible to combine vision and technology through low-/no-code integrations. These platforms enable extraordinary, future oriented, heavenly user experiences in identity.

14:35 (CEST) Are you in Firm Control of your External Identities?

Sicko van der Brug
RE RA

Sicko van der Brug RE RA, Productowner IAM, Jumbo Supermarkten

Jos Groenewegen, CTO, The Identity Managers
As an organization, you're in firm control: your employees' digital identities are in the HRM system, and they're given the correct roles, rights, and access to the IT environment through the Identity and Access Management solution. But does it work the same way if you use external help?

In many organizations we see that it is difficult to process data from these external identities in an efficient, secure, and controlled way. Can you manage the entire lifecycle of those identities?

Together with our customer Jumbo Supermarkten we tell you all about the challenges in managing and controlling the data of external identities.

- IAM and external identities, how Jumbo gets control
- External identities in general, how do you manage these
- 5 steps to get in control of your external identities

15:50 (CEST) Power of the Platform – Identity & Access Governance on ServiceNow

15:50 (CEST) Insurance Industry Case Study from PIB Insurance: How Zero Trust is Empowering Company Growth

Mark Edge

Mark Edge, Director Northern Europe, Cyolo

This session will look at how PIB Insurance moved to an identity-based zero trust access architecture to reduce their attack surface and improve their security posture, while simultaneously enabling the business to grow rapidly from 60 to over 2500 employees in a very short window, simplifying architectures, improving agility and efficiency and realising substantial cost savings along the way.

16:05 (CEST) Building a PAM positive mindset: From concept to implementation

Patricia Sousa Lara

Patricia Sousa Lara, Senior IAM Manager, Firmenich

For many organisations, privileged access management tends to be viewed as creating barriers and maintaining limitations imposed upon them by an outside authority due to regulatory requirements.

It is for these reasons that PAM is viewed not as a positive feature of an organisation's IAM investment strategy which complements its overall capabilities, but as a burdensome cost to the business. Many employees view it as simply another layer of control limiting their productive capacity.

We address, why PAM should be viewed as an instrument that can help pave a path to a more resilient, reliable, and robust future for the business.

Ensuring everyone has access to the right systems and data is critical for security and compliance.

16:20 (CEST) CIAM post-covid: How to better secure the virtualised enterprise for all

Stephen Amolo

Stephen Amolo, Cyber Security Engineer – Identity and Access Management, Luxembourg Institute of Science and Technology

In the post-COVID-19 era, IAM has become more critical than ever.

As businesses try to cope with the aftershocks and permanent changes brought about by the pandemic by adopting new cloud technologies, they now face a huge increase in users to manage as well.

Meanwhile, according to a recent poll, an average of 67 per cent of respondents expect the future of work to be a hybrid arrangement that mixes office, onsite and remote working — meaning that employees, where possible, will want the flexibility to choose to work wherever they want.

So, what does this "new normal" mean for IAM practitioners?

16:35 (CEST) Questions to the Panel of Speakers

16:50 (CEST) Closing Remarks from the Conference Chair

Robert Garskamp

Robert Garskamp, Founder, IDnext Association

Secure Your Identity

Identify your weak points, secure your environment, monitor your defences.

Identity Governance and Administration

Ensure the right people have access to the right things in your organisation, and automate it.

Workforce Access Management

Create a secure and seamless experience for your workforce.

Privileged Access Management

Guard your organisation's master key.

Customer Identity and Access Management

Secure and improve user experience for your customers.

How To Secure Your Digital Identity

Intragen's CEO, Alex Fagioli, discusses Identity Management as-a-Service in a hybrid cloud world. To hear more, join the session at **14:05**.

Are you trying to tackle an access control challenge?

Intra1 is your all-in-one fully-managed solution if you wish to benefit from **simplified enterprise IGA, accelerated compliance, and governance made easy.**

About Us

Founded in 2006, Intragen has delivered hundreds of **Identity and Access Management** services and has secured some of the biggest brands in the world. Maintain your organisation's integrity by having faith in ours. **Security** and **usability** are key to productive systems. Talk to us at **Stand 19** to discover how we can help improve yours.

PLATINUM SPONSORS

BEYOND TRUST

BeyondTrust is the worldwide leader in intelligent identity and access security, empowering organizations to protect identities, stop threats, and deliver dynamic access to empower and secure a work-from-anywhere world. Our integrated products and platform offer the industry's most advanced privileged access management (PAM) solution, enabling organizations to quickly shrink their attack surface across traditional, cloud and hybrid environments. With a heritage of innovation and a staunch commitment to customers, BeyondTrust solutions are easy to deploy, manage, and scale as businesses evolve. We are trusted by 20,000 customers, including 75 of the Fortune 100, and a global partner network. www.beyondtrust.com

DELINEA

Delinea is a leading provider of privileged access management (PAM) solutions that make security seamless for the modern, hybrid enterprise. Our solutions empower organizations to secure critical data, devices, code, and cloud infrastructure to help reduce risk, ensure compliance, and simplify security. Delinea removes complexity and defines the boundaries of access for thousands of customers worldwide, including over half of the Fortune 100. Our customers range from small businesses to the world's largest financial institutions, intelligence agencies, and critical infrastructure companies. www.delinea.com

FORGEROCK

ForgeRock®, (NYSE: FORG) is a global leader in digital identity that delivers modern and comprehensive identity and access management solutions for consumers, employees, and things to simply and safely access the connected world. Using ForgeRock, more than 1,300 global customer organizations orchestrate, manage, and secure the complete lifecycle of identities from dynamic access controls, governance, APIs, and storing authoritative data – consumable in any cloud or hybrid environment. The company is headquartered in San Francisco, California, with offices around the world. For more information and free downloads, visit www.forgerock.com

INTRAGEN

Intragen's mission is to protect your organisation by securing your digital identity and preventing unauthorised access. Intragen is made up of a team of IAM experts delivering solutions and services, including: Advanced Business Consulting – ensure that the solution is compatible with your organisation's mission. World Class Professional Services – advice and implementation utilising state-of-the-art deployment acceleration tools. Identity Management as a Service – trust Intragen's team to deliver and maintain your solution. Intragen's One Identity-based solutions and services are supported by the market-leading functionality of Intra, developed to accelerate implementation and reduce project risk and cost. www.intragen.com

OMADA

Omada, a global market leader in Identity Governance and Administration (IGA), offers a full-featured, enterprise-grade, cloud native IGA solution that enables organizations to achieve compliance, reduce risk, and maximize efficiency. Founded in 2000, Omada delivers innovative identity management to complex hybrid environments based on our proven best practice process framework and deployment approach. To ensure a successful IGA deployment, Omada provides an Identity Cloud Accelerator package that provides a reliable starting point for IGA projects with a standardized implementation approach for deployment, best-practice framework for process design, and training for efficient user adoption which organizations can deploy in 12 weeks. www.omadaidentity.com

PING IDENTITY

Ping Identity is pioneering Intelligent Identity. We help enterprises achieve Zero Trust identity-defined security and more personalized, streamlined user experiences. The Ping Intelligent Identity platform provides customers, employees and partners with access to cloud, mobile, SaaS and on-premises applications and APIs, while also managing identity and profile data at scale. Over half of the Fortune 100 choose us for our identity expertise, open standards leadership, and partnership with leading companies. We provide flexible options to extend hybrid IT environments and accelerate digital business initiatives with multi-factor authentication, single sign-on, access management, intelligent API security, directory and data governance capabilities. www.pingidentity.com

PWC

We are a community of solvers combining human ingenuity, experience and technology innovation to deliver sustained outcomes and build trust. We provide best-in-class solutions, for all the IAM-related challenges of your online business, such as: secure transactions, personalized engagement, seamless customer experiences, trusted access, smart authentication and cost efficient access risk management. PwC is one of the largest providers of business services in the world. With more than 325,000 people in 157 countries. Our clients include enterprises and foundations in all sectors, from small not-for-profit organizations to large multinational companies, but also local public bodies varying from municipalities to ministries. www.pwc.nl

SAILPOINT

SailPoint is the leading provider of identity security for the modern enterprise, empowering organisations worldwide to put identity security at the core of their business. With a foundation of artificial intelligence and machine learning, SailPoint identity security delivers the right access to the right identities and resources at the right time. www.sailpoint.com

GOLD SPONSORS

The company is headquartered in San Francisco, California, with offices around the world. For more information and free downloads, visit www.forgerock.com

OKTA

Okta is the leading independent identity provider. The Okta Identity Cloud enables organisations to securely connect the right people to the right technologies at the right time. We provide simple and secure access to people and organisations everywhere, giving them the confidence to reach their full potential. www.okta.com

ONE IDENTITY

One Identity helps organizations establish an identity-centric security strategy. Our identity and access management (IAM) portfolio, including identity governance, AD-centered IAM, privileged access management and identity SaaS solutions. www.oneidentity.com

SAVIYNT

Saviynt's cloud-built identity and access governance platform helps modern enterprises scale cloud initiatives and solve the toughest security and compliance challenges in record time. Saviynt brings together identity governance, granular application access, cloud security, and privileged access to secure the entire business ecosystem and provide a frictionless user experience. www.saviynt.com

SILVER PLUS SPONSORS

CLEAR SKYE

Clear Skye is the only cloud-native identity security and governance solution built natively on ServiceNow. Clear Skye places identity at the center of your enterprise's security efforts to make a range of critical business processes more effective, enhances your security and risk strategy, and raises platform value. www.clearsky.com

CYOLO

With its next-generation zero trust network access solution (ZTNA 2.0), Cyolo helps organizations in the IT and OT spaces connect their users seamlessly and securely to applications, files, servers, and desktops from any device on their local network or in the cloud. To learn more, visit www.cyolo.io

THE IDENTITY MANAGERS

The Identity Managers is a Dutch company that specialises in Identity & Access Management (business) consultancy, implementation and management of One Identity and Okta software. We distinguish ourselves through our practical approach, a strong combination of business consultancy and the ability to deliver the technical implementation. In addition to implementing and managing IAM solutions, we have developed the iD Veritas platform. Often organisations work with external employees in addition to their own workforce (on the payroll). Managing the on- and offboarding process for these external employees in an efficient, secure, and controlled manner, seems to be a challenging and leads to multiple points of friction. The iD Veritas platform offers a security-by-design architecture and a purpose-build solution for this challenge, by which organisations become fully in control of the entire life cycle of these external identities. Through a seamless connection to the existing Identity and Access Management solution of these organisations, the correct access and access rights will be (de)provisioned for the external identities. A unique feature of the iD Veritas platform is the option to delegate the administrative data management for the external identities, to the suppliers of these external employees. www.identitymanagers.nl

SILVER SPONSORS

CYBERIAM

CyberIAM is a leading Identity Access and Privileged Management Services Company. We provide the expertise needed for the design and implementation of complex Identity and Access Management (IAM) and Privileged Access Management (PAM) systems. Working closely with leading IAM/PAM vendors on delivery and management of their solutions into large organisations, we provide Professional, Expert, Managed, Advisory and 24/7 Support Services. We have helped deliver, support and upgrade some of the largest PAM and IAM projects globally. www.cyberiam.com

IDEIIO

ideiio is a world leader in the provision of identity, access management and governance software. As a SaaS solution, ideiio allows organisations to automate the management of employees as they join, move departments and leave the organisation. In doing this ideiio makes sure that employees have the right access to systems that they need to fulfil their role at the right time and importantly don't have access to systems outside of the scope of their role. www.ideiio.com

ONEWELCOME

OneWelcome is the leading European provider of cloud-based identity and access management (IAM) for external user groups. Its IAM platform enables organisations to provide external identities with secure and easy access to their online services and apps. Over 80 million people use the OneWelcome Cloud Identity platform every day. www.onewelcome.com

RSA

RSA is the trusted identity platform for 13,000 organizations around the world, managing 50 million identities and providing secure, convenient access to 30 million users. RSA empowers organizations to thrive in a digital world, with complete capabilities for modern authentication, lifecycle management and identity governance. www.rsa.com

SECZETTA

SecZetta provides third-party identity risk solutions that enable organizations to execute risk-based identity access and lifecycle strategies for diverse non-employee populations. Our solutions are purpose-built to manage the dynamic relationships organizations have with non-employees in an easy-to-use application that helps facilitate operational strategies, support regulatory compliance, and reduce third-party risk. www.seczetta.com

SENHASEGURA

Senhasegura is a global Privileged Access Management vendor. Our mission is to eliminate privilege abuse in organizations around the globe and build digital sovereignty. To accomplish this, Senhasegura works against data theft through the traceability of privileged actions of both human and machine identities on assets such as network devices, servers, databases, and DevOps environments. www.senhasegura.com

TRAXION

Traxion, part of the Swiss IT Security Group, is your partner in Identity Management as part of our Information Security portfolio. With our strategic, tactical and operational consultancy and services we work together with our clients towards robust and flexible solutions. From consulting, assessment, to design and implementation. Let's meet! www.traxion.com

TRUSTBUILDER

We build trust between your company and your customers, employees and business partners. Improve your company's digital maturity to gain new customers, increase customer engagement and grow revenue. Our end-to-end IAM solution bridges cybersecurity and user experience throughout the complete customer journey. As a European company, we highly value data privacy and comply with local regulations. www.trustbuilder.com

BRONZE SPONSORS

AKEYLESS

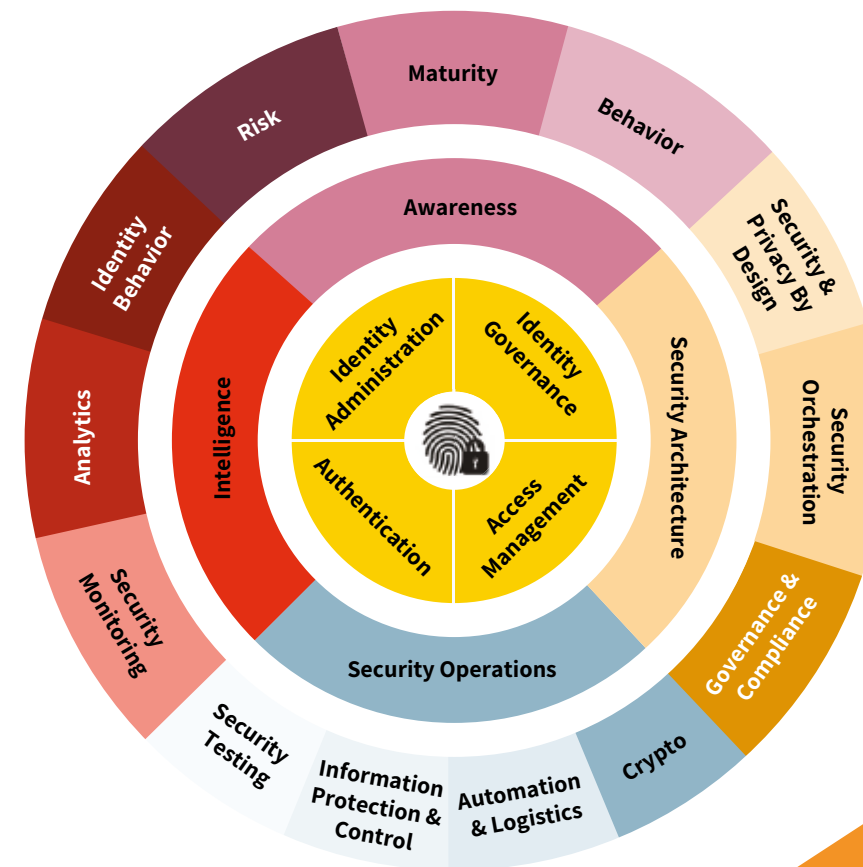

The Akeyless Vault Platform is a SaaS-based solution for Secrets Management that enables organizations to centrally manage credentials, certificates, and keys for humans and workloads, and accelerate DevOps workflows. Using a patented, FIPS 140-2 certified, KMS technology (Akeyless DFC), users keep full custody of their keys. www.akeyless.io

**Independent.
Dynamic. Involved.**

Traxion is an Information Security company with focus Identity, operating in Europe (DACH and the Benelux region) specialized in Identity & Access Management.

One of Traxion's most important assets is knowledge, gained through years of experience, constantly maintained through specialist training courses and always with an eye for future developments and challenges. Our specialists achieve successful projects in a broad range of – often complex – national and inter/multi-national organizations.

Since 2021 Traxion has been part of the Swiss IT Security Group. As a leading group of companies in the Benelux, Germany, Austria and Switzerland we combine the expertise of our partners to offer our clients a comprehensive portfolio of security services. This unique combination in the areas of Information Security, Cybersecurity and various Infrastructure & Workplace services allows us to put the client's interest first in every situation.
